## **DIRECTORS' REVIEW REPORT TO THE SHAREHOLDERS**

The Directors of your Company are pleased to present their review of the affairs of the Company for the 1<sup>st</sup> Quarter ended September 30, 2020.

### **ECONOMIC OVERVIEW**

With the world still reeling from the impacts of COVID-19 and dealing with its consequences, the IMF predicts the economic outlook to remain uncertain against the backdrop of world GDP which is expected to contract by 4.4 percent. In the latest World Economic Outlook, the IMF has forecasted the growth to be much slower than previously expected as a result of lasting damage inflicted by the COVID-19. Advanced economies are projected to contract by 5.8 percent with United States contracting by 4.3 percent and Euro Region taking a bigger hit by contracting 8.3 percent. Emerging Markets and Developing economies are projected to contract by 3.3 percent with China portraying a growth of 1.9 percent whereas India's GDP shrinking by 10.3 percent. Low income, developing countries and Middle East and North Africa are forecasted to shrink by 1.2 percent and 5 percent respectively.

Projections for Pakistan are on the milder spectrum, with GDP growth to declining to 0.4 percent in 2020 and is expected to increase by 1 percent in 2021.

During the Quarter under review, despite challenging environment, the major indicators have remained resilient since outbreak of COVID-19. Financial conditions remained accommodative with low financing rates and series of targeted measures undertaken by Government of Pakistan (GOP) and State Bank of Pakistan (SBP). A flexible market-determined exchange rate was introduced in May 2019, that has played its role as a shock absorber on an overall basis for the economy as a whole. Low global oil prices and subdued domestic demand helped to reduce the current account deficit further. Recovery in exports and remittances have performed strongly, as well as the remittances witnessed a record high figure. These have helped to restore SBP's foreign exchange reserves to their pre-pandemic level of around US\$ 12.8 billion. As a result, Pakistan's reserve adequacy is now back above the important global benchmark of 3 months of import cover and the current account deficit remain at around 2 percent of GDP.

### **INDUSTRIAL OVERVIEW**

Following a deep contraction between March and June, the large-scale manufacturing (LSM) index returned to expansion in July, however, the economic recovery remains uneven across industries, with the hospitality and certain services sectors especially lagging. According to trade data released by Pakistan Bureau of Statistics (PBS), the exports of the country registered nominal decline of one percent to \$5.46 billion during the quarter under review as compared with \$5.51 billion in the same quarter of the last fiscal year whereas the import bill of the country increased to \$11.26 billion during the first quarter of current fiscal year as compared with \$11.1 billion in the corresponding period of the last fiscal year.

On the contrary, the textile export registered a growth of 2.9 percent to US\$ 3.5 billion in 1<sup>st</sup> quarter of FY 2020-21 (US\$ 3.4 billion 1<sup>st</sup> quarter FY 2019-20). Towel, Knit Wear, Bed Wear and Readymade Garments saw an increase of 13.3 percent, 10.5 percent, 8.4 percent and 5.2 percent respectively; whereas Cotton

Yarn and Cotton Cloth declined by 42.6 percent and 8.5 percent respectively. The textile industry has yet to fully recover from the COVID-19 repercussions, dealing with internal and external challenges.

## FINANCIAL PERFORMANCE

Key performance numbers are presented below:

	Units	1 <sup>st</sup> Quarter ended September 30, 2020	1 <sup>st</sup> Quarter ended September 30, 2019
Export sales	Rs. in millions	14,495	9,262
Local sales	Rs. in millions	5,163	4,940
Total sales	Rs. in millions	19,658	14,202
Gross profit	Rs. in millions	3,523	2,908
Profit before tax	Rs. in millions	841	530
Profit after tax	Rs. in millions	599	365
Earnings per share (EPS)	Rupees	1.40	1.02
Gross Profit Margin	%	17.9	20.5
Profit before tax Margin	%	4.28	3.7
Profit after tax Margin	%	3.05	2.6

Our company performed well in the quarter under review and demonstrated full recovery in the export markets that enabled full capacity utilization of our plants and machinery. The results were achieved by in-depth customer relationship management and a very dedicated effort of our entire management team. The company's exports have grown by 56.5% compared with first quarter of last year though the margins were slightly compromised. The newly introduced flexible market-determined exchange rate resulted in appreciation of PKR otherwise the export sales figures and gross margins would have been better. Our local yarn revenue as well as retail revenue have also revived during the quarter. However, the pace of recovery would have been far greater if it were not for the heavy torrential rains we received. Higher sales helped to achieve higher profits when compared to comparative quarter of last year. Though gross profit percentage was lower than the first quarter of last year but is higher than the margin of financial year 19-20. The revaluation in exchange rate has negatively impacted the gross profit value. Profit before and after tax are higher both in percentage terms as well as rupee value and resultantly the EPS has improved. Profit after tax would have been far higher but the GOP withdrew the tax credit on Investment in Machinery.

## FUTURE OUTLOOK

With the impending threat of lockdowns following second wave of the pandemic, Pakistan's textile sector is facing uncertainty with respect to business operations. However, the continued support of the government policies and improved cooperation from China in the shape of reduced duties has increased business volume in textile sector.

While countries are striving to minimize the economic slowdown due to lockdowns and sluggish economic activities, the damage would have been greater if the governments and banks around the world had not responded with sizable, swift and unprecedented policy measures and support strategies in the form of variety of fiscal countermeasures, efforts to cushion income losses, incentivize hiring, expand social assistance, guarantee credit and implementing SOPs. Consequently, the IMF projects world GDP to grow by 5.2 percent in 2021 as economies recover from the depths of the great lockdown in April 2020. Amid the risk of widespread economic shutdowns and continued spread of the pandemic calls for continued backing from policy makers and government institutions in the form of wage support, cash payments and credit lines which will prove to be critical lifelines until recovery is more deep rooted. Nonetheless, it is imperative that a vaccine is developed in order to combat the novel coronavirus so that further economic losses and loss of life can be prevented.

The textile industry, being one of the major contributors in LSM and the backbone of exports, needs to focus on sustainability and survival in these unpredictable times. However, this would only be possible with the support of GOP with commitment to policy implementation, improved energy supply, helping exporters to build competitive cost advantage.

The Company has its focus on investment in the balancing and modernisation of production machinery, and measures to rationalise costs besides extending its reach to new markets as well as new customers. With the increase in production capacities, through technologically advance machinery, the sales and production efficiency would improve further given the condition that the health crisis facing the world is under control and surge in the spread of COVID-19 is curbed. The risks conceived now, which may impact profit includes, increasing cost of raw material, bad cotton crop, continuous appreciation of PKR against US\$, rising inflation, expected increase in gas prices and mark-up rates etc. However, our management would strive to achieve the best possible results like in past.

**2 BASIS OF PREPARATION**

These condensed interim unconsolidated financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan for interim financial reporting. The accounting and reporting standards as applicable in Pakistan for interim financial reporting comprise of:

- International Accounting Standard (IAS) 34, "Interim Financial Reporting", issued by International Accounting Standard Board (IASB) as notified under the Companies Act, 2017; and
- Provisions of and directives issued under the Companies Act, 2017.

Where the provisions of and directives issued under the Companies Act, 2017 differ with the requirements of IAS 34, the provisions of and directives issued under the Companies Act, 2017 have been followed.

These condensed interim un-consolidated financial statements comprise of the condensed interim un-consolidated statement of financial position as at September 30, 2020 and the condensed interim un-consolidated statement of profit or loss, condensed interim un-consolidated statement of comprehensive income, condensed interim un-consolidated statement of cash flows and condensed interim un-consolidated statement of changes in equity for the quarter ended September 30, 2020.

The comparative statement of financial position, presented in these condensed interim un-consolidated financial statements, as at June 30, 2020 has been extracted from the audited un-consolidated financial statements of the Company for the year ended June 30, 2019, whereas the comparative condensed interim un-consolidated statement of profit or loss, condensed interim un-consolidated statement of comprehensive income, condensed interim un-consolidated statement of cash flows and condensed interim un-consolidated statement of changes in equity for the quarter ended September 30, 2020 have been extracted from the condensed interim un-consolidated financial statements of the Company for the quarter ended September 30, 2019.

These condensed interim unconsolidated financial statements do not include all the information required in annual financial statements prepared in accordance with approved accounting standards as applicable in Pakistan, and should be read in conjunction with the un-consolidated financial statements for the year ended June 30, 2020.

## 2.1 Change in accounting standards, interpretations and amendments to published approved accounting and reporting standards

### (a) New standards, amendments and interpretation to published approved accounting and reporting standards which are effective during the quarter ended September 30, 2020

There are certain amendments and an interpretation to approved accounting and reporting standards which are mandatory for the Company's annual accounting period beginning on July 1, 2020; however, these do not have any significant impact on these unconsolidated condensed interim financial statements hence not detailed.

## 3 ACCOUNTING ESTIMATES, JUDGEMENTS AND FINANCIAL RISK MANAGEMENT

The preparation of these condensed interim un-consolidated financial statements requires management to make estimates, assumptions and use judgments that affect the application of policies and reported amounts of assets and liabilities and income and expenses. Estimates, assumptions and judgments are continually evaluated and are based on historical experience and other factors, including reasonable expectations of future events. Revisions to accounting estimates are recognised prospectively commencing from the period of revision. Judgments and estimates made by the management in the preparation of these condensed interim financial statements are the same as those that were applied to financial statements as at and for the year ended June 30, 2020.

The Company's financial risk objectives and policies are consistent with those disclosed in the annual audited financial statements as at and for the year ended June 30, 2020.

## 16 FAIR VALUES

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique.

The Company while assessing fair values uses valuation techniques that are appropriate in the circumstances using relevant observable data as far as possible and minimizing the use of unobservable inputs. Fair values are categorized into following three levels based on the input used in the valuation techniques;

- Level 1 Quoted prices in active markets for identical assets or liabilities that can be assessed at measurement.
- Level 2 Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 Inputs are unobservable inputs for the asset or liability inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

Financial assets and liabilities of the Company are either short term in nature or are repriced periodically therefore; their carrying amounts approximate their fair values.

Transfers, if any, between levels of the fair value hierarchy is recognized at the end of the reporting period during which the transfer has occurred. The Company's policy for determining when transfers between levels in the hierarchy have occurred includes monitoring of changes in market and trading activity and changes in inputs used in valuation techniques.

As at year end the fair value of all the financial assets and liabilities approximates to their carrying values. The property plant and equipment is carried at cost less accumulated depreciation and impairment if any, except free-hold land, lease-hold land and capital work in progress which are stated at cost. Long term investments in subsidiaries represent the investment in unquoted shares of companies carried at cost. The Company does not expect that unobservable inputs may have significant effect on fair values.

## 16 FAIR VALUES

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique.

The Holding Company while assessing fair values uses valuation techniques that are appropriate in the circumstances using relevant observable data as far as possible and minimizing the use of unobservable inputs. Fair values are categorized into following three levels based on the input used in the valuation techniques;

- Level 1                      Quoted prices in active markets for identical assets or liabilities that can be assessed at measurement.
- Level 2                      Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3                      Inputs are unobservable inputs for the asset or liability inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

Financial assets and liabilities of the Holding Company are either short term in nature or are repriced periodically therefore; their carrying amounts approximate their fair values.

Transfers, if any, between levels of the fair value hierarchy is recognized at the end of the reporting period during which the transfer has occurred. The Holding Company's policy for determining when transfers between levels in the hierarchy have occurred includes monitoring of changes in market and trading activity and changes in inputs used in valuation techniques.

As at year end the fair value of all the financial assets and liabilities approximates to their carrying values. The property plant and equipment is carried at cost less accumulated depreciation and impairment if any, except freehold land, leasehold land and capital work in progress which are stated at cost. Long term investments in subsidiaries represent the investment in unquoted shares of companies carried at cost. The Holding Company does not expect that unobservable inputs may have significant effect on fair values.
